Financial Highlights

9M 2025 Financial Highlights

Insurance Revenue

The Company achieved strong growth in insurance revenue, driven by the execution of our strategic roadmap. These initiatives have laid a foundation for profitability and future growth.

Net Insurance Service and Financial Results

The Company achieved net insurance service and financial result of \$5.1 million. The decrease for the period primarily reflects our planned strategic growth investment expenses, higher claims from natural catastrophe and proactive provisioning as we expand our distribution across the region.

These factors are consistent with our long-term growth strategy which focuses on strengthening our market presence, enhancing resilience and positioning the business for sustainable profitability.

Non-underwriting Income

Non-underwriting income increased to \$13.7 million due to the proactive positioning of our investment portfolio and selection of dividend yielding equities.

Total Comprehensive Income

Total comprehensive income after tax increased to \$40.6 million as a result of significant marked-to-market gains on equity and fixed income investments.
