Net claims incurred increased by \$0.1 million or 1.0%. As such, net incurred loss ratio increased to 32.6% in 9M20. Net commission income increased by \$0.15 million due to higher reinsurance commission recovery from reinsurers. Management expenses decreased by 3.9% to \$9.86 million. The decrease was mainly due to financial support for employers under the government's Jobs Support Scheme and lower marketing and telemarketing expenses during COVID-19 circuit breaker period.

(III)	<u>Profit Components</u>			
(i)	Net Underwriting Profit	12.37	12.26	0.9
(ii)	Non-Underwriting Income	5.75	18.83	(69.5)
(iii)	Net Profit Before Tax	18.12	31.09	(41.7)

Consequently, underwriting profit increased by 0.9% to \$12.37 million and underwriting profit ratio increased by 0.8 percentage point to 41.3%.

Non-underwriting income was \$5.75 million as compared to \$18.83 million in the corresponding period last year. The decrease was due mainly to the adverse market conditions arising from the COVID-19 pandemic and global recession. In the comparative period last year, there were realised and unrealised gains from unit trusts and a one-time special dividend received from an equity investment which were not repeated in 2020.

Consequently, overall profit before tax decreased by 41.7% to \$18.12 million.

Other comprehensive income, net of tax, which affects the balance sheet and not the profit before tax had recorded a loss of \$11.75 million instead of an income of \$14.81 million in the corresponding period last year, as global markets fell into a tailspin since late February when the Covid-19 turned into a global pandemic.

Overall, total comprehensive income decreased by \$37.53 million or 91.7%, when compared to the corresponding period last year due to underperformance of investment.
